

Table 1

Old/ Numbered Page	New Page	Protocol	Change/ detail
9		Determination of death/ Dead on scene	Expands obvious death/ DNR description and clarification if paramedic not on scene
11		Discontinuation of resuscitation	Adds 20 min requirement for ALS care prior to termination, Defines asystole, requires efforts to make a medical control call prior to termination <i>Note: medical standard of care is not to provide treatments that will not benefit the patient</i>
12		Discontinuation of resuscitation	Clarification if paramedic is not on scene
16		Trauma Triage	Updated to new ACS trauma triage
17		Trauma Triage	Updated map to TCs
62		CHF	Indication for CHF, NIPPV for EMT, inotrope/ epi for cardiogenic shock
	45	Mandatory Med list	Added statement on required medications vs optional medications Added d10 to mandatory meds, made versed or ativan- removed valium (could still be used), tetracaine, TXA, famotidine Removed dopamine as mandatory, added ketamine and nitrous oxide as optional Removed sotalol from optional
	46	AEMT medication election form	Medical director will specify which meds AEMTs can use for them
48		Acute Coronary Syndrome	Computer STEMI recognition for EMT, early defib pad placement for STEMI,
50		Acute Coronary Syndrome	AEMT pain meds/ nausea meds, STEMI bypass for PCI
51		AHA ACS Algorithm 2015	outdated/ not pertinent- removed page
54		Cardiac Arrest	AED for EMT, ,Epi for AEMT, promote immediate defib
55		ACLS cardiac arrest algorithm	Updated to 2020
	63	Allergic Reaction/ Anaphylaxis	New protocol
66		Anaphylaxis	Deleted old protocol, replaced with new adult and peds
67		COPD/ asthma	EMT NIPPV, EMT bronchodilators (including ipratropium) and MDI, PM oral prednisone
69		Hypoglycemia	AEMT d10, revise rate of infusion, makes tx level 80 mg/dl with symptoms
74		Nausea/ vomiting	AEMT medications
75		Non-traumatic abdominal pain	AEMT pain medication
77		Pain Management	AEMT morphine/ fentanyl/ toradol/ nitrous, paramedic ketamine,
New page	78	Nitrous oxide	New protocol
85		Nerve Agents and Organophosphates	Updates bdz dosing for seizures
87		Seizure protocol	Updates bdz dosing, emphasizes early treatment
99		Altered mental status	Give naloxone if suspected opiate OD
110		Neonatal Resus	AEMT epi for arrest
112		Pediatric Arrest	AEMT epi for arrest, EMT airway management
113		Pediatric Arrest	Reference to traumatic arrest protocol, Post arrest- push dose epi and removed dopamine
114		Peds Arrest algorithm	Updated algorithm
117		Peds bradycardia algorithm	Updated algorithm
119		Peds tachycardia algorithm	Updated algorithm
120		Peds Shock	Added push dose epi, removed dopamine
121		Peds Shock	Peds Push Dose epi instructions
124		Peds allergic reaction	Replaced old allergic reaction protocol with new one
	124	Allergic Reaction Anaphylaxis	New protocol, adult and peds on same protocol
126		Peds Asthma	Adds optional ipratropium
128		Peds hypoglycemia	Alternative glucose dosing instructions
130		Peds abdominal pain	AEMT pain medication
137		Peds Seizure	Update bdz for seizure
139		Peds N/V	AEMT zofran
148		Trach care in respiratory distress	Clarified steps
162-165	161	Traumatic Arrest Resuscitation	New protocol
166	165	Simple Thoracostomy in Trauma arrest	New protocol
Old 161	180, 205	Spinal immobilization- now Spinal Motion Restriction	Removed the texts pages and the spine assessment pages, updated the algorithm, removed Canadian C spine assessment
163		Head injury	Clarified indication for hyperventilation in impending herniation
176		Burns	Removed HCO3 for suspected rhabdo in the field and focus on fluid resus, clarified fluids
	180	IV antibiotics for open fracture	Cefazolin for open fracture- adult and peds
186		Peds Head injury	Clarified indication for hyperventilation in impending herniation
193-194		Peds Pain management- now 131-132	Moved into general section, added AEMT pain meds, added reference to nitrous oxide, changed pain-dose ketamine infusion

Old/ Numbered Page	New Page	Protocol	Change/ detail
	207	Snake bite	Removed lymphatic band
212		Hypothermia	Active warming, instructions on frostbite care
213		Hypothermia	Note about warm fluids, clarify CPR instructions
214		Hypothermia	Removed benzo for shivering
216		Hypothermia	Removed moderate/ severe pages (repetitive)
218		Airway algorithm	new
218		UNiversal airway algorithm	deleted, replaced
219		Failed airway, difficult airway graphic	Replaced with new algorithm
228		Pediatric airway	Added line on ETCO2
230		Pediatric airway	Added line on ETCO2
234		Posit intubation care	Clarified paralysis statement, added line on ETCO2
New page	230	RSI/ RSA/ DSI	New protocol
235	236	CPAP	Removed upper limit of 10
237		KING LTD	Modified indication for King tube
238		LMA	Modified indication
248		Mech Ventilation	Added note on paralysis, added ketamine for sedation
247		EID	Removed page
256		IO	Added clearer instructions on lidocaine for IO analgesia
257		IO	Added distal femur as site, clarified preferred order of sites
265		Interfacility transfers	Modified/ clarified blurb on hospital personnel
275		Magnesium infusion monitoring	Clarified paramedic requirement
284		Propofol transport	Removed requirement for 2nd paramedic
	294	Ancef drug sheet	
	312	Ketamine drug sheet	
	328	Nitrous Oxide drug sheet	
380		Toxmedic list	Removed amyl nitrate, sodium nitrate, sodium thiosulfate (Lily Kit- irrelevant with cyanokit)
ALL		Most SBP 90 is now MAP 65 Deliver O2 if SPO2<94% Updated logos
